

Dear users,

First of all, thank you for giving us the opportunity to serve you!

Before using this product, please read the instructions carefully.

This "manual" is intended to introduce you the basic characteristics of this product, in order to help you using it at the best way. This manual describes the product's features and information in details, as well as recommendations and attentions to help you fully understand the technical characteristics of the product.

In the annex provided with the product, you will find "warranty card", which indicates the effectiveness of the relevant provisions of maintenance, as well as additional services provided to users, please read it carefully in order to avoid unnecessary problems. The product has powerful functions and high performance, it will greatly improve your enjoy and satisfaction online.

Special note:

All the information in this manual is correct at time of publication. However, as we continue to update and improve the product, so the software on your device may be described slightly different in appearance and functions.

(We reserve the right to improve products, specifications and designs are subject to change without notice!)

FCC Warning

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment . This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Note:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Appearance Preview

1. Appearance Introduction

This chapter describes the appearance of the machine, including buttons and ports; it will guide you to understand the features and accessories.

1. Appearance

(1) Touch screen

(2) Speakers

(3) Power switch

(4) Reset

(5) USB

(6) TF card slot

(7) Search button

(8) Return

(9) Menu

(10) Main interface

Appearance Preview

Note: (1) The LCD is a touch screen; you can carry out clicking and dragging operations in the touch area; please do not use pen, pencil or other sharp objects to click on the screen to avoid scratching.

(2) Please keep the speakers clean to avoid the dirt blocking the hole and affect the sound.

2. TF card

When plug a TF card, please do follow the icon on the machine, pay attention to the direction of oblique angle.

(When remove the card, press the card with your thumb and release, the card will be automatically ejected.)

Note: (1) Do not let objects come into the card slot. (In order to prevent the harm of dust or moisture, please put cards back into box or package)

(2) To remove a TF card with the machine on, please uninstall the TF card: first select "Select SD card and memory device" in "Settings interface" and then click "Uninstall SD card."

3. Charge

This product uses 5V-2.5A standard voltage, Please use the attached power charger, other chargers may cause failure and risk.

Do not use the charger in humid environment. If your hands and feet are wet, please do not touch the charger.

When using the charger or charging the product, please maintain good ventilation, do not cover the machine with paper or other items resulting in reduced cooling effect.

First experience

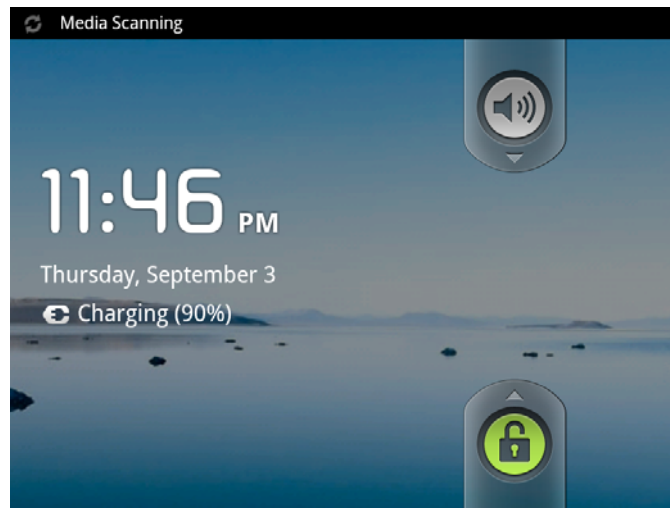

The MID can achieve a variety of operating modes: (1) Clicking. (2) Holding. (3) Sliding. (4) Dragging. (5) Rotating.

Keys action definition: (1) Short press: the time is less than 1.2 seconds. (2) Long press: the time is longer than 3 seconds. There are all short presses in this manual without special instructions.

360 degree rotation: for most interfaces or images, it can automatically rotate the screen from horizontal into vertical as long as rotate the MID.

1. Boot the MID

1. Press the power switch at the side of the machine (long press), the machine will be booted. The LCD screen will display booting screen and animation first, a few seconds later, it will enter into the main interface, shown as below.

2. Drag the slider to unlock and start using.

2. Shutdown

When the MID is running, press the main power switch (long press), the system will display the shutdown screen.

First experience

Click the "Power off" button, another interface will pop-up (upper right), after clicking "Confirm", the MID will enter the shutting down status, in a few seconds the machine will shutdown.

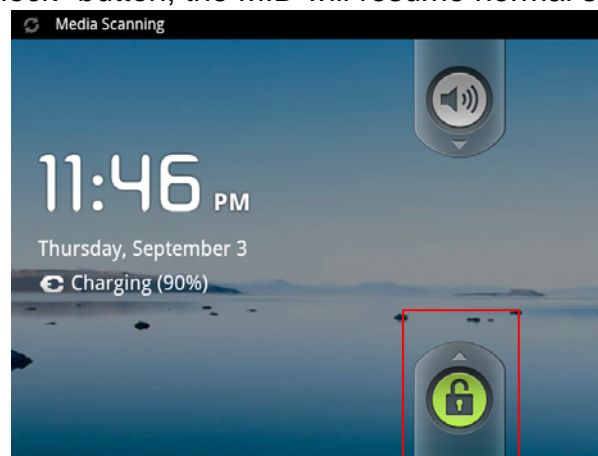

**** When battery is running low, the system will automatically shut down.

3. Lock-screen and power-saving mode

When the machine is on, press the power switch or the screen is inactivity a certain time, the MID will enter into screen-off / lock-screen status for power saving. Then MID programs are still running, but the screen is blank.

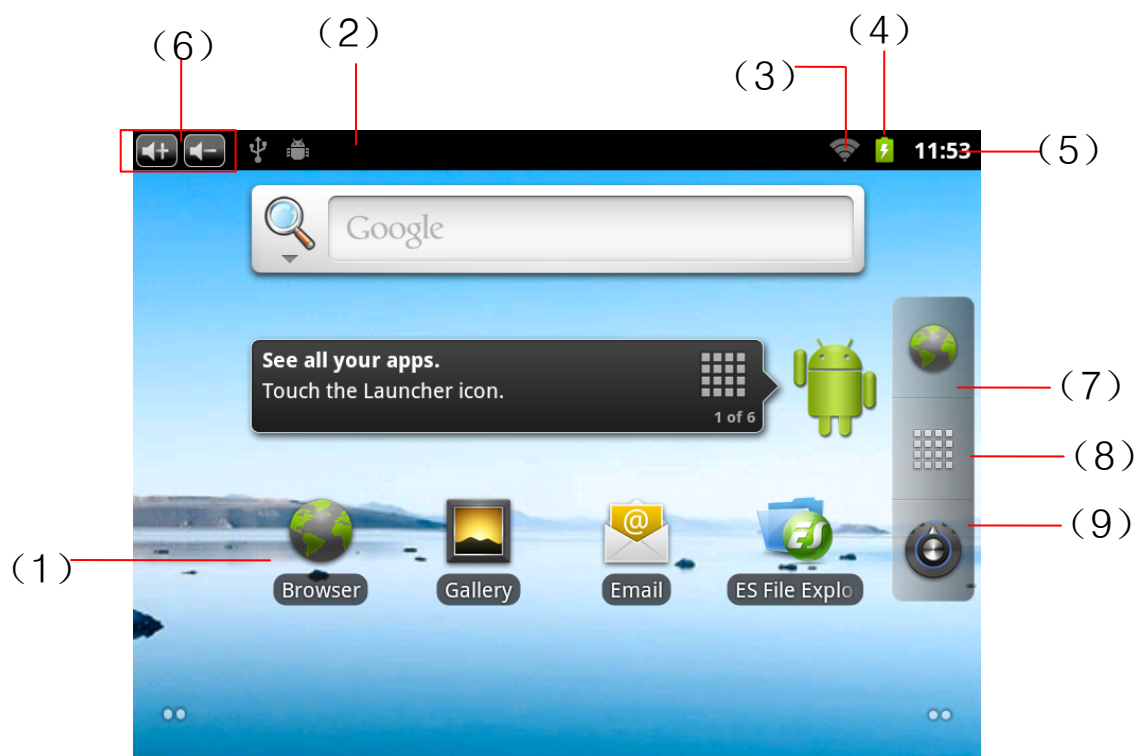

When press the power switch again, MID will open the unlock menu.

(1) Drag upward of "lock" button, the MID will resume normal state.

(2) Drag downward of "Volume" button, the MID is in mute state.

4. Main interface description

First experience

- | | | |
|---|--|---|
| (1) Shortcut icons | (2) Status bar | (3)  WIFI network icon |
| (4)  Battery indicator | (5) Time display | (6)  Volume + / - |
| (7)  Browser | (8)  Applications | (9)  Set |

Descriptions:

When connect the machine to a network through WIFI, if the connection is successful, the " Network icon" will be displayed.

5. Operating experience

1. At the main interface, sliding the middle of the screen left and right can realize switching of different main interfaces; the machine has three main interfaces. Users can load different icons in each interface.

Note: the load of icons will be described in detail in later chapters.

2. Click "Menu" button, at the bottom of screen will pop up "Menu Window."

Then click the rest of the screen, "Menu Window" will disappear.

First experience

3, Click "  Applications function", MID will pull out "application function keys interface."

Through sliding the screen upward and downward, you can browse shortcut icons of all applications.

Click the  button, "application function key interface" will be hidden.

4. Load of shortcut icons on the main interface.

For ease of use, users can freely add or delete the shortcut icon of commonly used software on the main interface. There are two ways to add shortcut icons:

A. Long press or drag the icon in "application interface key function" to the main interface.

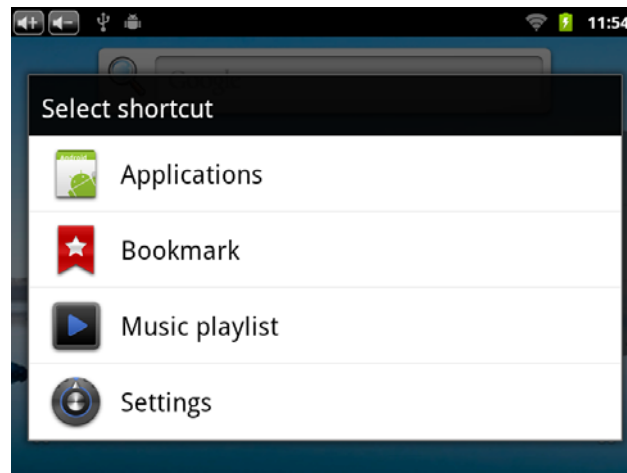

B. Click the  button in "Menu window", MID will pop-up corresponding menu.

Taking the following operation as an example:

1-1 Click "Shortcut" to enter the next menu (bottom left)

First experience

Press the icon in sub-menu, it will be added to the main interface.

1-2 Click "Widgets" or "Folders" to enter the next menu

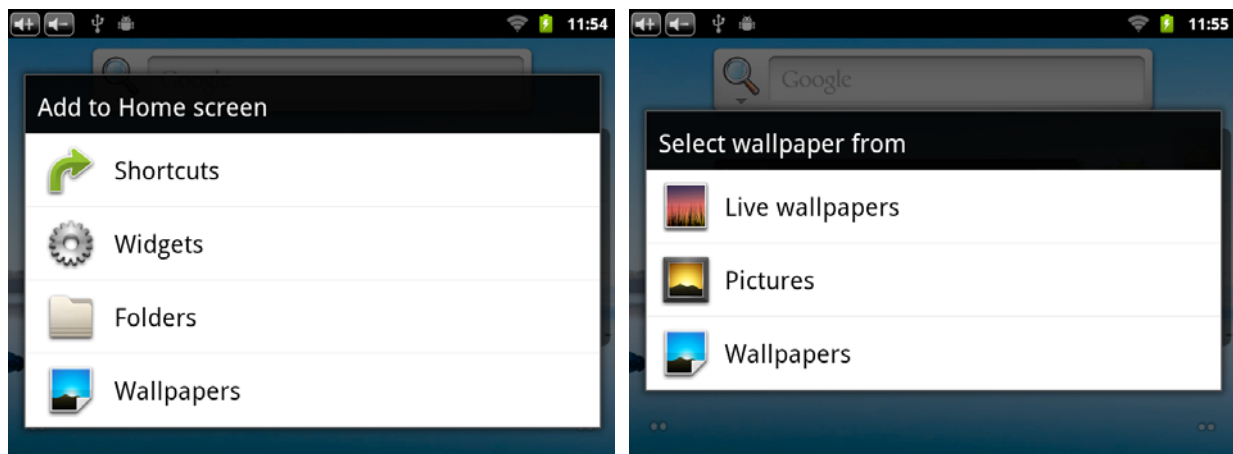

Press the icon in sub-menu, it will be added to the main interface.

5. Interchange of wallpapers on the main interface

In order to decorate personalized main interface, users can set their favorite pictures, photos ... as wallpaper of the main interface.
